

Make your own...

Lungfish Toothplate Christmas Decoration!

To make your
Lungfish Toothplate:

1. Decorate the toothplate shape and cut it out along the solid black lines.
2. Fold your toothplate to give it its crushing ridges. Fold along the dotted lines, folding up on one line, down on the next like making a paper fan.
3. Being very careful, make a hole where marked by a circle at the top (you can do this by putting a piece of blue tac or plastacine on a solid surface and pushing a hole through with a pencil). Thread through some thread or ribbon to hang up your decoration!
