

Merry Megatherium Garland

Make a festive garland inspired by the bones of the neck of our fabulous Giant Ground Sloth!

1. Cut out this template, including the shaded areas.
2. Take a long piece of paper (wrapping paper works well). Draw round the template with the right hand side touching the right hand edge of the strip of paper.
3. Fold the paper into a zigzag, so it looks like this:

Make sure the folds are where the dotted lines are in the template.

4. Bring the paper all together in a pile. Carefully cut out, cutting through all the layers of paper.
5. Open out and enjoy your garland! It should look like lots of neck vertebrae joined together.
